Summary

Full Stack Developer with a B.Sc. in Computer Engineering. Builds Django REST Framework APIs and React front ends on PostgreSQL, and takes them from schema design to deployment. Sole developer of a live municipal inspection platform that replaced a paper workflow and now runs 1,069 facilities and 7,716 reports. Open to remote and relocation roles.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frameworks & Libraries: Django, Django REST Framework (DRF), React.js, Redux, Flask, Tailwind CSS
Databases: PostgreSQL, SQLite, relational data modeling, schema design, database migrations
Tools & Deployment: Git, GitHub, Docker, Linux, Postman, pytest, Vercel, Railway, PythonAnywhere
Practices: RESTful API design, role-based access control (RBAC), authentication, Agile/Scrum, code reviews, unit testing, debugging
Currently learning: Java, Spring Boot

Experience

- Freelance Developer** Sep 2025 – Present
Full Stack Developer Alexandria, Egypt (Remote)
- Shipped small web and mobile applications for individual clients, deployment included.
 - Kept earlier projects running in production, including a solo rebuild behind a cleaner API layer.
 - Built self-directed Django, React, and Java/Spring Boot projects to go deeper on API design and authentication.
- Rustaq Municipality** May 2025 – Aug 2025
Freelance Full Stack Developer Oman (Remote)
- Replaced a paper inspection workflow with a Django and PostgreSQL platform, sole developer from schema to deployment. Live demo: kaboelnaga.pythonanywhere.com/login
 - Moved inspection reporting into the field with Django REST Framework APIs, so supervisors review centrally instead of collecting paper.
 - Kept inspector, supervisor, and admin records separate through 3-tier role-based access control.
 - Carried 7,716 live records into a re-modeled schema without losing a row or pausing daily inspections.
 - Runs today across 1,069 facilities and 13 daily users, with schema, API, interface, and hosting all owned solo.

Projects

- PneumoXpert** | *React.js, JavaScript, REST API, Docker* demo | repo
- Sole frontend developer on a four-person team, building the React interface over the team's REST classification API.
 - Rebuilt it alone behind one API layer, so backend endpoint changes stop breaking the interface.
- Pet Society** | *React.js, Vite, REST API, Authentication* demo | repo
- Traced a stale Axios auth-token cache that was breaking client sessions, and fixed it.
 - Unblocked the team's Vite and PostCSS build so the app could ship.
- Django Blog Platform** | *Python, Django, PostgreSQL, AdminLTE* repo
- Moved the app off SQLite onto PostgreSQL with no data lost, unlocking concurrent writes.
 - Restricted post editing to the owning author with role-based permissions over Django auth.

Education

- Arab Academy for Science, Technology & Maritime Transport** 2024
B.Sc. Computer Engineering Alexandria, Egypt
- Egyptian Collegiate Programming Contest, 64th place (2020); Arab Collegiate Programming Contest contestant (2020).

Certifications

- Information Technology Institute (ITI)** — Full Stack Web Development, Python & React, 2025
ALX Software Engineering Programme — Frontend & Backend Development, 2025
Meta Front-End Developer — Coursera, 2024
